TOTAL								

Classic scoring (official)

Only the round winner scores. Add up every card still held by the other players and write that total in the winner's column; everyone else gets 0 for the round. First to **500** wins.

Lowest score wins (popular variant)

Each player writes down the value of their **own** leftover cards every round (the winner writes 0). Play a set number of rounds or until someone reaches 500; the **lowest** total wins.

Tips

Appoint one scorekeeper. Count out loud card by card. Write the running total, not just the round score, so the 500 line is easy to spot.

Free to print and share for home, classroom, club and café use. More UNO rules, variants and tools: **unorules.ca**
